App Feature

Single Page

Add

3

Select any of the 5 provided templates. You can customize page elements within HTML Editor or upload background image to create pages like Homepage, About, Contact Us, etc.

Photo Gallery

Add

Easily upload photos to create a specific album or multiple albums as a photo gallery to your app. A specific album can be set as downloadable or not.

Video

Add

Upload videos to your app, so your app users can play the video once they connect to internet, and they can also download it if it's downloadable.

Notification

Add

You can add any notification targeted to your app users. App user who has this app will get the notification you add here once they connect to internet and they can share the notification to Weibo.

Audio

Add

Upload audios to your app, so your app users can play the audio once they connect to internet, and they can also download it if it's downloadable.

News

Add

Create specific news detail to generate the news list. App users can click any news title via the list to view details.

Cast

Add

Create specific cast detail to generate the page list. App users can click any cast title via the list to view details.

Form

Add

You can select any of the form fields provided, enter the form introduction text, and set the "Thank You Message" to create your own form.

Event

Add

You can add the event details and provide "RSVP" options for the app users to select in Android UI. All the "RSVP" options from the app users can be tracked by the admin system.

Are you sure you want to delete this record?

YES

NO

- Description:
- Feature Function: Photo Gallery
Example Feature: Photo Gallery – List View
- Notes:
- 1

Click "Add New" to pop up the "Add New" page for App Creator to add a new album.
- 2

Total "View" column will get the total number from the Android UI that how many people click to view the photos in one album.
- 3

Total "Like" column will get the total number from the Android UI that how many people click "Like" button of every photo in one album.
- 4

Total "Comment" column will get the total number from the Android UI that how many people comment the photos in one album.
- 5

App Creator can change the album to be "Downloadable" or not in detail page
- 6

Click "Edit" button to pop up the "Edit" page to make any revisions to a specific album.
- 7

Click "Delete" to pop up a confirm box before actually deleting an album.

Submit

Notes:

- 1 This section will generate the basic info of the app
- 2 If the App Creator adds features but do not add anything to, then this section will be displayed as a warning and block the app submission. Otherwise, this section will be hidden and the app can be submitted normally.

- 3 The feature had nothing in it will be listed here with the name that App Creator customized.

- 4 This is a sentence set for warning for the feature.

Click "Submit", there will be two situations:

- 5 1) If it is the first time for App Creator to submit an app, then a confirm box would pop up that "Are you sure to submit your app to Android Market? Otherwise, it would save as draft in "My App. Yes/No". Click "Yes" to submit the app to our system and refresh to show next page; click "No" to direct to save it as a "Draft" and direct to "My App" list page.

- 6 2) If its an Android approved app and App Creator just make some revisions and click "Submit" here, a message saying "The revisions will be reflected directly for your app in Android Market. Are you sure to submit the changes? Yes/No." Click "Yes" to update the app in a real-time in Android Market and refresh to next page; click "No" to direct to "My App" list page.
